***Allowable Subject Matter***

1. Claims 1, 8-10, 17, and 20 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Claim 1 includes the limitation of the node is a bi-directional interface pin for interfacing bi-directional signals to the first and second peripheral integrated circuits, wherein the first switch means comprises a transmission gate having a select input coupled to said signal means, a first terminal connected to said node and a second terminal coupled to said first circuit, and the second switch means comprises a transmission gate having a select input coupled to said signal means, a first terminal connected to said node and a second terminal coupled to said second circuit, which is not shown by the prior art of record in the combination as disclosed and claimed.

Claim 8 includes the limitation of the first switch means comprises a first transparent latch having a gate input coupled to the first chip select signal means, whereby a state of said node may be maintained at said first peripheral integrated circuit when said first chip select signal means deselects communication with said first peripheral integrated circuit, which is not shown by the prior art of record in the combination as disclosed and claimed.

Claim 17 includes the limitation of a transparent latch having an input coupled to an output of the selector, whereby a state of said node that reflects an output of said selected one of said peripheral integrated circuits is held after said asserted one of said chip select signals is deasserted, which is not shown by the prior art of record in the combination as disclosed and claimed.
